Where do I find the AuthInfo/AuthCode ?

To move a domain from EUserv Internet you need the AuthInfo (for DE-domains) or AuthCode (for COM/NET/ORG/INFO/BIN/NAME/EU-domains).

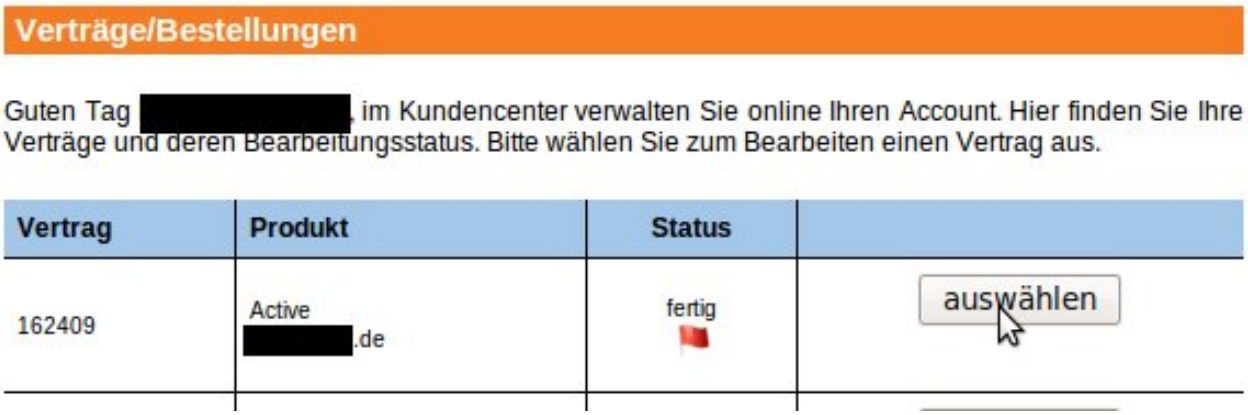

The AuthInfo/AuthCode for the respective domain can be found in the customer center.

Please proceed as follows:

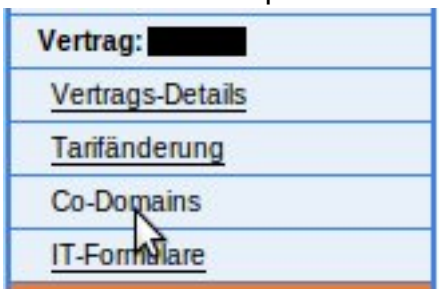

1. Log in to the customer center with your eMail address and password.

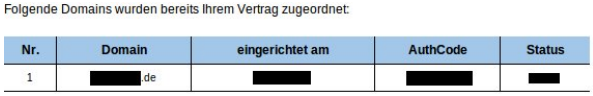

2. Select the contract where the domain is kept.

3. Choose the menu point "Co-Domains" from the left menu.

4. There you will find a table of all domains that belong to this contract. If the AuthInfo / AuthCode is enabled it will be displayed there.
