Where do I find the AuthInfo/AuthCode ?

To move a domain from EUserv Internet you need the AuthInfo (for DE-domains) or AuthCode (for COM/NET/ORG/INFO/BIN/NAME/EU-domains).
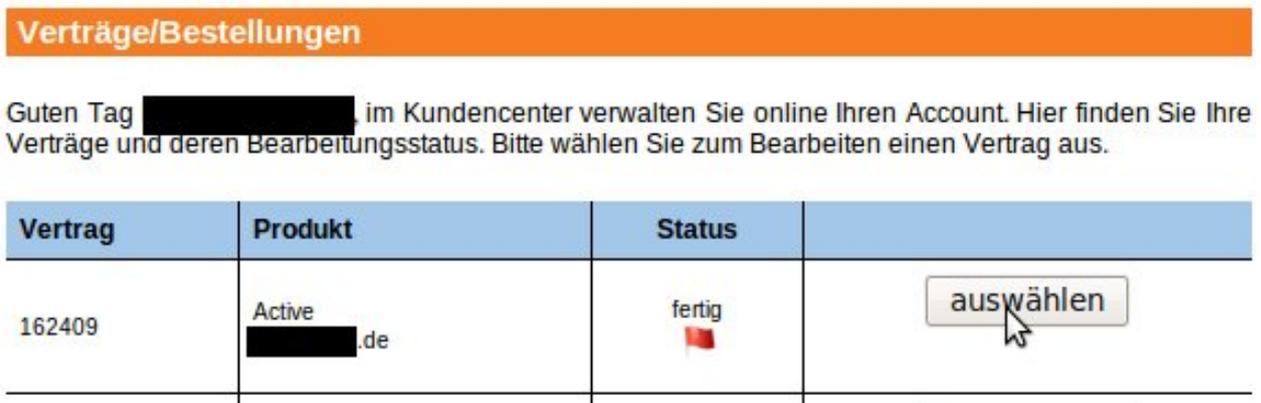

The AuthInfo/AuthCode for the respective domain can be found in the customer center.

Please proceed as follows:

1. Log in to the customer center with your eMail address and password.

2. Select the contract where the domain is kept.

3. Choose the menu point "Co-Domains" from the left menu.

4. There you will find a table of all domains that belong to this contract. If the AuthInfo / AuthCode is enabled it will be displayed there.

Folgende Domains wurden bereits Ihrem Vertrag zugeordnet:

Nr.	Domain	eingerichtet am	AuthCode	Status
1	███.de	██████	██████	██

Unique solution ID: #1401
Author: EUserv Kundensupport
