# How can I use the SMTP-Mailserver as Mail-Relay Host?

**Problem:**

You want to use your local mailserver with EUserv SMTP mailserver as mail-relay host.

**Solution:**

You must configure your local mailserver as SMTP client with STMP authentication (username / password) against the SMTP-mailserver.

Please proceed with the following steps:

1. Create an email account in customer panel.
2. Map an email-address to this new created email-account.
3. Wait until all services have been activated by our system (this takes max. 24h)
4. Configure your local mailserver with username / password of your mailaccount.
5. Test the config and watch the maillog at your local mailserver.

**Known problems:**

none
